# DataDora

- DataDora is purpose-built software designed for enterprises to automatically process data from various email sources in minutes. This high-performing and flexible application provides deeper insight into data collected from emails.

- DataDora simplifies your data collection, so you can spend less time managing your data and more time analysing it.

- DataDora can be deployed in the cloud or on-premises, and it integrates well with both internal and cloud email systems.
Data collecting & processing using FormSG

Login to Formsg via Internet or Intranet

Create a new form and choose Email mode

Build and share form link with citizens

Collect confidential responses in your email

Collate responses into an Excel with our data collation tool

Data collection & processing is automated by DataDora
